EXPERIENCE

Chakra Dialogues Foundation || SDE Intern

📅 February 2025 - Present

📍 New Delhi

- Developed responsive UI components using Angular and React, optimizing for cross-browser compatibility and multiple screen sizes.
- Assisted in designing and developing RESTful APIs to support new frontend features.
- Implemented and tested Razorpay payment integration to provide users with a secure and seamless checkout experience.
- Contributed to deployment with Docker and related tools.
- Designed reusable UI components and layouts in Figma to streamline frontend development.
- Resolved 50+ bugs and launched 20+ features, significantly improving app efficiency.
- Gathered product requirements and conducted membership surveys to align features with user needs.

ADM Educational & Welfare Society || UI/UX Intern

📅 June 2024 - August 2024

📍 Gurugram, Haryana

- Developed interactive prototypes and mockups to visualize design solutions before implementation.
- Assisted in creating and maintaining a design system for consistency across products.
- Analyzed user feedback and incorporated insights into iterative design improvements.
- Collaborated closely with product managers and developers to align design goals with business requirements.
- Documented design guidelines and best practices to support future team members.
- Reviewed existing user interfaces and suggested enhancements to improve overall user experience.

PR Team Member || Volunteer TechSoc, MSIT

📅 September 2022 - October 2023

📍 Janakpuri, Delhi

- Managed PR and outreach, promoting events, workshops, and competitions. Created marketing content and collaborated with the team to boost engagement.

EDUCATION

B.TECH | CS Engineering

Maharaja Surajmal Institute of Technology, Janakpuri

CGPA 8.45

📅 2021 - 25

PROJECTS

Just Do It

📅 Sept-Oct 2023

Built a feature-rich, visually engaging to-do list app with task management and theme switching.

Implemented sub-second task updates(<1 sec) and DOM manipulation using JavaScript to deliver a smooth, interactive user experience.

Image Generator

📅 Mar-Apr 2023

Developed a React image generator leveraging external APIs to deliver real-time AI visuals with 90% success rate.

Created a responsive UI with optimized state management for smooth performance across devices.

Foody Zone

📅 Mar-Apr 2023

Built a MERN-based food ordering app with live cart updates, secure login, and order tracking.

Improved cross-device performance by 25% with a responsive, user-friendly interface and optimized UI design.
